## What's new in INCISIVE MD?

This is a small release to correct an issue with the new AMA® Current Procedural Terminology (CPT)® Anterior Cervical Decompression and Fusion (ACDF) procedure code 22551/22552.

## Who should read these release notes?

### *If you are an INCISIVE MD user ...*

Read this entire document for revised features included in this update.

### *If you are the clinic technical contact ...*

No action is required to update the software if users have administrative privileges to update the \Program Files directory. The INCISIVE MD application will auto-detect and install the update when the user attempts to log into the application following the release of the update to your clinic. For clinics using terminal services, please contact INCISIVE Support for instructions on manually updating users' profiles.

## Application Stops Working when CPT 77003 Selected and Selected Contract is Expired

When auditing the contractual expected amount of a coded surgery that included AMA CPT 77003 along with a selected contract that had expired, the application would stop working and display an Exception dialog. It is a common scenario at the end of the calendar year for contract terms to expire. We have corrected the underlying issue with this workflow and coded surgery scenario.

## Display of Assistant Checkbox Not Shows for AMA CPT PPI

For contract terms that had their Payment Policy Indicator (PPIs) set to **AMA CPT**, the application would not display assistant at surgery checkboxes on the **Coded Surgery Summary Tab** for any new 2011 AMA CPT procedure code. We have corrected this issue and the Assistant checkbox will now display. The affected procedure codes are listed below along with the assigned PPI settings

CPT	Multiple Procedure Modifier 51	Bilateral Modifier 50	Assistant Modifier 80	Co-Surgeon Modifier 62	Team Surgery Modifier 66
